

Android Developer (3-5 Years of Experience)

Description

We are looking for an Android Developer who possesses a passion for pushing mobile technologies to the limits. This Android app developer will work with our team of talented engineers to design and build the next generation of our applications on the mobile platform. Android programming works closely with other app development and technical teams.

Job Profile:

The Android Developer provides clear, pragmatic solutions for integrating Artelus' web based products onto the mobile platform. The Android Developer must work closely with various teams on the creation and implementation of android based mobile apps. To accomplish this, he/she must be able articulate and illustrate solutions to these challenges. The ability to prototype and implement proposals combined with industry practices and focus group research is also critical to the success of this role and a reasonably high level of HTML and CSS expertise is also required. The Android Developer reports to the Product Manager.

Responsibilities

- Design and build advanced applications for the Android platform
- Collaborate with cross-functional teams to define, design, and ship new features
- Work with outside data sources and APIs
- Unit-test code for robustness, including edge cases, usability, and general reliability
- Work on bug fixing and improving application performance
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency

Requirements

- Bachelors/Master's degree in Computer Science, Engineering or a related subject
- Proven software development experience and Android skills development
- Proven working experience in Android app development and
- Have published at least one original Android app
- Experience with Android SDK
- Experience working with remote data via REST and JSON
- Experience with third-party libraries and APIs

- Working knowledge of the general mobile landscape, architectures, trends, and emerging technologies
- Solid understanding of the full mobile development life cycle.
- Familiarity with UI-UX Designing will be a definite bonus
- Familiarity with Machine Learning will be an additional plus factor

Job Type: Full time, permanent

Job Location: Bangalore
